# Introdução ao Ruby on Rails

by Jackson Pires

A gem Friendly Id:

https://github.com/norman/friendly id

#### Instalando:

```
gem 'friendly_id', '~> 5.4.0'
$> bundle install
```

#### Configurando:

```
rails g migration AddSlugToArticles slug:uniq
rails generate friendly_id
```

\$> rails db:migrate

#### Configurando:

```
class Article < ApplicationRecord
  extend FriendlyId
  friendly_id :title, use: :slugged
end</pre>
```

#### Configurando:

```
Trocar isso:
@article = Article.find(params[:id])

Por isso:
@article = Article.friendly.find(params[:id])
```

#### Git

```
$> git add .
$> git commit -m "usando friendly id para identificar
artigos"
```
